The screenshot shows a Google Jamboard titled "Gravitas Jamboard" with a grid of 24 sticky notes. The notes are organized into sections: "Salad?", "Snake Section", "Treat section", "List of staple feeders", "Nutritional Value", "Show where you can find the food", "Have facts about your reptile", "Compare prices of food", "List of common health problems", "Select what type of reptile you have", "Section for frogs/amphibians", "Sounds your reptile may make", "Vitamin supplement information", "The negative effects of malnutrition on the reptile", "Include common signs of malnutrition?", "Larger snakes may consume bigger prey when compared to smaller snakes.", "How much does each reptile eat ex: Bearded dragon, different snakes, etc", "Wait time between each food type (staple and non-staple foods)", "Natural Diet vs Captive Diet", "Shows where you can find your reptile in the wild", "Information of breeding your own feeder animals", "Input how much you have been feeding your reptile to adjust its diet", "Bromation information", "Ability to compare the nutritional value of two or more feeders side by side", "Information about stores that are the 'problem' for reptile malnutrition", "Cost of providing proper nutrition for reptiles", "Season differences in diet?", "Information about differences in feeding based off of what would be common occurrences (snakes not eating because of a large meal, etc)", "Informations about breeding reptiles", "Diet recommendations based on specific animals", "Built in feeding calendar", "How long is the nutritious food good for? Will it go bad?", "Home made foods viable?", "List of trusted websites for further information", "Shows which reptile are dangerous and which aren't", "General health analysis based off of basic info: information about the pet (gender/weight, color or patterns in shedding)", "Captive Habitat information? (i.e. specific flooring, bathroom area, padding, cage, etc)", and "Heating requirements for the digestion of certain foods".
